SUMMARY

Software Engineering and Full-Stack Developer with hands-on experience designing and deploying scalable web applications, backend APIs, and desktop systems using C#, PHP (Laravel), ASP.NET Core, and MySQL. Strong foundation in relational database optimization, MVC architecture, and full-cycle software delivery gained through comprehensive industry training programs, a 6-month internship, and high-impact practical projects.

EDUCATION

Ahram Canadian University (ACU)

(2024 - 2028)

Bachelor in Computer Science & Artificial Intelligence (3rd Year) | Software Major | GPA: 3.23 / 4.00

SKILLS

- **Programming Languages:** C++, C#, PHP, Python, JavaScript (ES6+), SQL, HTML5, CSS3
- **Frameworks & Backend:** ASP.NET Core, Laravel, Entity Framework Core, LINQ, Bootstrap
- **Databases & Tools:** MySQL, Git, GitHub, RESTful APIs, Google Apps Script, Vercel
- **Core Competencies:** Full-Stack Development, MVC Architecture, Database Design & Optimization, UI/UX Design, Agile Collaboration
- **Soft Skills:** Communication Skills, Teamwork & Collaboration, Problem-Solving, Time Management, Adaptability & Flexibility, Critical Thinking, Leadership, Presentation Skills, Decision-Making, Continuous Learning.

INTERNSHIP EXPERIENCE

Software Development Intern | 6-Month Technology Internship

(Nov 2025 – May 2026)

- Engineered and maintained backend modules and RESTful endpoints using PHP, Laravel, and MySQL, improving query response times.
- Built responsive, user-friendly frontend interfaces using JavaScript, HTML5, and CSS3, ensuring full cross-platform compatibility.
- Collaborated in an Agile development environment utilizing Git/GitHub for version control, code reviews, and structured debugging workflows.

PROJECTS

[FitZone – Fitness & Nutrition Management System](#) | PHP, Laravel, MySQL, JavaScript, Bootstrap

- Engineered a full-stack health platform allowing users to log customized workout plans, track dietary metrics, and view real-time progress.
- Designed normalized database tables and optimized complex relational queries to handle user profile data and workout logs efficiently.

[Enterprise Resource Planning \(ERP\) System](#) | PHP, Laravel, MySQL, JavaScript, Bootstrap

- Developed a multi-module management application handling inventory operations, transaction histories, and administrative reports.
- Implemented robust data validation, automated error handling, and structured LINQ queries to ensure reliable record management.

[Interactive E-Learning & Assessment Platform](#) | PHP, JavaScript, MySQL, CSS3

- Built a modular learning management portal with automated online quizzes, student evaluation metrics, and instructor management views.

[GB-Corp Race Game](#) | HTML, CSS, JavaScript

- Designed and developed the complete front-end racing game from scratch, implementing the user interface, game layout, and interactive gameplay experience.
- Developed JavaScript-based game mechanics, including player movement, controls, collision detection, scoring, and game-state management.
- Created a responsive and engaging interface optimized for different screen sizes and user interactions.

[PC-Builder](#) | PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

- Developed a full-stack PC Builder web application as part of the NTI training program, enabling users to browse, select, and configure PC components.
- Designed and implemented the MySQL database and backend logic to manage products, categories, component specifications, and user interactions.

- Built responsive front-end interfaces using HTML, CSS, JavaScript, and Bootstrap, with PHP handling server-side functionality and database operations.

Courses & Description

Full-Stack Web Development in PHP & Laravel / *National Telecommunication Institute (NTI)* (July – August 2026)

- Developed end-to-end web applications implementing MVC architecture, secure database migrations, and optimized SQL data schemas.
- Integrated role-based access control (RBAC), user authentication sessions, and dynamic admin reporting dashboards.

Back-End Web Development & Professional Foundations / *ALX* (May 2025 – January 2026)

- Completed professional training focused on back-end web development, programming fundamentals, problem-solving, and building practical software development skills.
- Gained hands-on experience with back-end concepts, software engineering practices, and professional development skills through project-based learning.

Web Development & Python Training Track / *Sprints.ai* (July – August 2025)

- Completed practical training in Python and web development, covering programming fundamentals, web technologies, and application development.
- Applied programming and web development concepts through hands-on exercises and practical projects.

Backend Development Specialization in PHP & Laravel / *Black Horse* (April– July 2026)

- Completed specialized backend development training focused on server-side programming, databases, APIs, and building dynamic web applications.
- Developed practical backend skills through hands-on projects and real-world development practices.

Full-Stack .NET Development / *digital egypt pioneers initiative (DEPI)* (July 2026 – Present)

- Developed end-to-end web applications implementing MVC architecture, secure database migrations, and optimized SQL data schemas.
- Integrated role-based access control (RBAC), user authentication sessions, and dynamic admin reporting dashboards.
